

GitHub & VS Code

How to Sign Up and Push a File – Step by Step

Student Training Document · 19 May 2026

Section 1 – Create a GitHub Account

GitHub is a website where you can store and share your code. First, create a free account.

Step 1: Open your browser and go to `github.com`

You will see the GitHub homepage. Look for the Sign up button in the top-right corner of the screen.

Note: The red arrow in the screenshot points to the Sign up button.

Step 2: Click Sign up and fill in the form

Enter your Username, Email address, and Password. Then click Continue.

The screenshot shows the GitHub account creation form. A red box labeled 'Fill each field' has an arrow pointing to the 'Username' field, which contains 'student123'. Below it is the 'Email address' field with 'student@email.com'. The 'Password' field is masked with dots. At the bottom is a green 'Continue →' button. A red box labeled 'Click Continue' has an arrow pointing to the 'Continue' button.

Create your account

Username
student123

Email address
student@email.com

Password
.....

Continue →

Fill Username → Fill Email → Fill Password → Click Continue

Step 3: Verify your email

GitHub sends a verification link to your email. Open your email inbox, find the message from GitHub, and click the link to activate your account.

Check inbox → Open GitHub email → Click verify link → Account activated ✓

Section 2 – Install Git on Your Computer

Git is a tool that tracks changes in your code and lets you send (push) files to GitHub.

Step 1: Download Git from git-scm.com/downloads

Open Browser → **Go to git-scm.com/downloads** → **Click your OS (Windows / Mac / Linux)**

Step 2: Run the installer

Open the downloaded file and click Next on every screen. Keep all default settings.

Note: Make sure 'Add Git to PATH' checkbox is ticked — the screenshot shows the recommended options.

Step 3: Check Git installed correctly

Open Command Prompt (Windows) or Terminal (Mac/Linux) and type:

```
git --version
```

You should see something like: git version 2.43.0

Section 3 – Configure Git with Your Name & Email

Git needs to know who you are. Run these two commands in your Terminal or Command Prompt:

Step 1: Set your name

```
git config --global user.name "Your Full Name"
```

Step 2: Set your email (use the same email as GitHub)

```
git config --global user.email "youremail@example.com"
```

Step 3: Check your settings

```
git config --list
```

```
PS C:\Users\pkolh\Downloads\portfolio p> git config --global user.name "Prathameshk-07"  
PS C:\Users\pkolh\Downloads\portfolio p> git config --global user.email "pkolhe2007@gmail.com"  
PS C:\Users\pkolh\Downloads\portfolio p> git config --list  
diff.astextplain.textconv=astextplain  
git.version=2.45.1
```

Section 4 – Create a Repository on GitHub

A repository is like a folder on GitHub where your project files live.

Step 1: Log in and go to New Repository

Log in to GitHub → **Click your profile picture** → **Click Your repositories** → **Click New** (green button)

1. Click your profile picture:

2. Click Your repositories:

3. Click New :

Step 2: Fill in the repository form

- Repository name — type: my-first-project
- Description — short note about the project
- Select Public
- Tick Add a README file

Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).
Required fields are marked with an asterisk (*).

1 General

Owner *

Prathameshk-07

Repository name *

Great repository names are short and memorable. How about [solid-broccoli](#)?

Description

0 / 350 characters

2 Configuration

Choose visibility *

Choose who can see and commit to this repository

Public

Add README

READMEs can be used as longer descriptions. [About READMEs](#)

Off ☐

Add .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

No .gitignore

Add license

Licenses explain how others can use your code. [About licenses](#)

No license

Create repository

Step 3: Click Create repository:

2 Configuration

Choose visibility *

Choose who can see and commit to this repository

Public

Add README

READMEs can be used as longer descriptions. [About READMEs](#)

Off ☐

Add .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

No .gitignore

Add license

Licenses explain how others can use your code. [About licenses](#)

No license

Create repository

Section 5 – Open the Project in VS Code

Step 1: Open VS code

Step 2: Click on file

Step 3: Click on open folder

Step 4: Select a folder and open it

Section 6- Push File by using VS code

Step 1: Click on terminal

Step 2: Open new terminal

Step 3: Add the comand to Push Files into git hub

1. Initialise the git by git init

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  PORTS  TERMINAL

PS C:\Users\pkolh\Downloads\portfolio p> git init
Reinitialized existing Git repository in C:/Users/pkolh/Downloads/portfolio p/.git/
PS C:\Users\pkolh\Downloads\portfolio p> 
```

2. Git Status

```
PS C:\Users\pkolh\Downloads\portfolio p> git init
Reinitialized existing Git repository in C:/Users/pkolh/Downloads/portfolio p/.git/
PS C:\Users\pkolh\Downloads\portfolio p> git status
On branch main
nothing to commit, working tree clean
PS C:\Users\pkolh\Downloads\portfolio p> 
```

3. Git Branch -M main

```

PS C:\Users\pkolh\Downloads\portfolio p> git init
Reinitialized existing Git repository in C:/Users/pkolh/Downloads/portfolio p/.git/
PS C:\Users\pkolh\Downloads\portfolio p> git status
On branch main
nothing to commit, working tree clean
PS C:\Users\pkolh\Downloads\portfolio p> git branch -M main
PS C:\Users\pkolh\Downloads\portfolio p>

```

4. Git commit -m "Message"

```

PS C:\Users\pkolh\Downloads\portfolio p> git init
Reinitialized existing Git repository in C:/Users/pkolh/Downloads/portfolio p/.git/
PS C:\Users\pkolh\Downloads\portfolio p> git status
On branch main
nothing to commit, working tree clean
PS C:\Users\pkolh\Downloads\portfolio p> git branch -M main
PS C:\Users\pkolh\Downloads\portfolio p> git commit -m "Portfolio Upload"
On branch main
nothing to commit, working tree clean
PS C:\Users\pkolh\Downloads\portfolio p>

```

5. Git add .

```

PS C:\Users\pkolh\Downloads\portfolio p> git init
Reinitialized existing Git repository in C:/Users/pkolh/Downloads/portfolio p/.git/
PS C:\Users\pkolh\Downloads\portfolio p> git status
On branch main
nothing to commit, working tree clean
PS C:\Users\pkolh\Downloads\portfolio p> git branch -M main
PS C:\Users\pkolh\Downloads\portfolio p> git commit -m "Portfolio Upload"
On branch main
nothing to commit, working tree clean
PS C:\Users\pkolh\Downloads\portfolio p> git add .
PS C:\Users\pkolh\Downloads\portfolio p>

```

6. Git remote add origin "Address".git

```

On branch main
nothing to commit, working tree clean
PS C:\Users\pkolh\Downloads\portfolio p> git add .
PS C:\Users\pkolh\Downloads\portfolio p> git remote add origin https://github.com/Prathameshk-07/TL_Intern_Prathame
sh.git

```

7. Git push origin main -force

```
PS C:\Users\pkolh\Downloads\portfolio > git add .
PS C:\Users\pkolh\Downloads\portfolio > git remote add origin https://github.com/Prathamesh-07/TL_Intern_Prathamesh.git
error: remote origin already exists.
PS C:\Users\pkolh\Downloads\portfolio > git push origin main --force
Everything up-to-date
PS C:\Users\pkolh\Downloads\portfolio >
```

Section 7- Check the pushed files

1. Go to repositories

2. Go to our Repo we want to add file on it

3. The file appear in Repo

The screenshot displays a GitHub repository interface. At the top, the repository name 'TL_Intern_Prathamesh' is shown with a 'Public' badge. Below this, the main branch 'main' is selected, along with '1 Branch' and '0 Tags'. A search bar and 'Add file' button are visible. The commit history shows a recent commit 'Prathameshk-07 Portfolio Upload' with a green checkmark, dated '15d912b · 2 days ago' and having '2 Commits'. A red arrow points to this commit. Below the commit, a table lists the files: 'assets', 'app.js', 'index.html', and 'style.css', all with the description 'Portfolio upload' and '2 days ago'. The 'README' section is currently empty, showing a prompt to 'Add a README' to help people understand the project.

File	Description	Time
assets	Portfolio upload	2 days ago
app.js	Portfolio upload	2 days ago
index.html	Portfolio Upload	2 days ago
style.css	Portfolio Upload	2 days ago

The File successfully push the file in git hub
